

Meeting protocol

9.11.2006

Participants

- Thomas Tischler
- Stefan Zeltner
- Philipp Gruber
- Reinhardt Jeschull
- Thomas Kuhndörfer

Steps done

- Worked out a standard file header for all source files, see `orga/guidelines/File-Comment-Header.odt`
- Presentation of the gui-prototype with a compilation test on two different linux machines
- After a compilation test of the math library we recognised that different preprocessor terms for modul exports are necessary to achieve platform independency

Tasks until the next meeting

- Find a solution for modul export that is compileable with windows and linux: rjeschull
- Creation of a matching interface to connect the GUI with the underlying system: szeltner, ttischler
- Integration of the new log class into the system. Rewrite of the realisation of the singleton-behaviour: pgruber

Next milestone

- Alpha-Build: 16.11.2006

Notes

- A special meeting will be held on 14.11.2006 to complete the first build
- If it's necessary, an additional meeting will be held on 15.11.2006
- A laptop with an installed eclipse windows environment is needed for the next meeting: pgruber, rjeschull
