

# Meeting protocol

16.11.2006

## Participants

- Thomas Tischler
- Stefan Zeltner
- Philipp Gruber
- Reinhardt Jeschull
- Thomas Kuhndörfer

## Steps done

- A special meeting on 14.11.2006: Spent several hours to resolve build errors
- Presentation of the alpha-build to our project director Prof. Dr. Hartmann
- Discussed some ergonomic aspects of the gui from the alpha-build, for example the turn controls are not really reasonable
- Discussed how to save the 3 dimensional data in the best manner

## Tasks until the next meeting

- Beginning with the implementation of the renderer modul: rjeschull
- Find a solution for saving the internal data state in connection to the renderer: tkuhndo
- Changing the build process to a qmake-only system: szeltner
- More functional draft of the gui and add usual elements to the gui: ttischler
- Creation of first simple plugins: pgruber

## Next milestone

- Beta-Build: 21.12.2006

## Notes

- Prof. Dr. Hartmann demanded an component diagram of the complete program in UML. This should be done during the next weeks.
